2. RATINGS

The Certificates to be issued have not been rated.

3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE/OFFER

Save for fees, if any, payable to the Dealer, and so far as the Issuer is aware, no person involved in the issue of the Certificates has an interest material to the offer.

Société Générale will ensure the roles of provider of hedging instruments to the Issuer of the Certificates and Calculation Agent of the Certificates.

The possibility of conflicts of interest between the different roles of Société Générale on one hand, and between those of Société Générale in these roles and those of the Certificateholders on the other hand cannot be excluded.

Furthermore, given the banking activities of Société Générale, conflicts may arise between the interests of Société Générale acting in these capacities (including business relationship with the issuers of the financial instruments being underlyings of the Certificates or possession of non public information in relation with them) and those of the Certificateholders. Finally, the activities of Société Générale on the underlying financial instrument(s), on its proprietary account or on behalf of its customers, or the establishment of hedging transactions, may also have an impact on the price of these instruments and their liquidity, and thus may be in conflict with the interests of the Certificateholders.

4. REASONS FOR THE OFFER AND USE OF PROCEEDS, ESTIMATED NET PROCEEDS AND TOTAL EXPENSES

7. PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT

(i) PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT (*Structured Certificates only*)

The value of the Certificates, the payment of a coupon amount on a relevant interest payment date to a Certificateholder, the payment of an automatic early redemption amount on a relevant automatic early redemption date and the payment of a redemption amount to a Certificateholder on the maturity date will depend on the performance of the underlying asset(s), on the relevant valuation date(s).

The value of the Certificates is linked to the positive or negative performance of the underlying instrument. The amounts to be paid are determined on the basis of the condition which is satisfied (or not) if the performance of the underlying instrument is higher than or equal to a predefined barrier performance.

The Certificates may provide for an automatic early redemption linked to a specific event. Therefore, this may prevent the Certificateholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.

The terms and conditions of the Certificates may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Certificates may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Certificates allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the maturity date of the Certificates, postpone the maturity date of the Certificates, early redeem the Certificates on the basis of the market value of these Certificates, or deduct from any due amount the increase cost of hedging, and in each case without the consent of the Certificateholders.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Certificates are calculated by reference to certain underlying(s), the return of the Certificates is based on changes in the value of the underlying(s), which may fluctuate. Potential investors should be aware that these Certificates may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.

During the lifetime of the Certificates, the market value of these Certificates may be lower than the invested capital.

Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.

The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.

Legal form: Public limited liability company (société anonyme). Legislation under which the Issuer operates: French law. Country of incorporation: France. B.19/ B.4b: 2014 was another challenging year for the economy, with global activity posting only moderate growth that varied by region. This trend is expected to carry over into 2015, which is shaping up to deliver a weaker-than-expected global economic recovery amid myriad uncertainties both on the geopolitical front and on the commodity and forex markets. The euro zone is struggling to return to more dynamic growth, thus slowing the

reduction of public deficits. Interest rates should remain at record lows, but the deflationary risk should be kept under control by the intervention of the ECB which has announced the implementation of a more accommodative monetary policy and the use of its balance sheet to support growth. The depreciation of the euro and falling oil prices should help boost exports and stimulate domestic demand. The US economy should stay on a positive track and the Fed is expected to begin tightening its monetary policy mid-year. Emerging countries have entered a phase of more moderate growth, in particular China. Russia's economy is struggling with the consequences of the Ukrainian crisis coupled with the drop in commodity prices.

From a regulatory standpoint, 2014 saw the implementation of the Banking Union. The European Central Bank took the helm of the Single Supervisory Mechanism, overseeing some 130 euro zone banks, with the aim of strengthening the banking system, restoring the confidence of economic operators, harmonising banking supervision rules and reducing the link between banks and their national authorities.

In terms of regulatory ratios, the Group can already meet the new requirements.

Section D – Risks		
D.2	Key information on the key risks that are specific to the issuer and the guarantor	<p>The Group is exposed to the risks inherent in its core businesses.</p> <p>The Group's risk management focuses on the following main categories of risks, any of which could materially adversely affect the Group's business, results of operations and financial condition:</p> <p>Credit and counterparty risk (including country risk): risk of losses arising</p>

		<p>from the inability of the Group's customers, issuers or other counterparties to meet their financial commitments. Credit risk includes counterparty risk linked to market transactions (replacement risk) and as well as securitisation activities.</p> <p>Market risk: risk of a loss of value on financial instruments arising from changes in market parameters, volatility of these parameters and correlations between them.</p> <p>Operational risks: risk of losses or sanctions due to inadequacies or failures in internal procedures or systems, human error or external events;</p> <p>Structural interest and exchange rate risk: risk of loss or of write-downs in the Group's assets arising from variations in interest or exchange rates.</p> <p>Liquidity risk: risk of the Group not being able to meet its cash or collateral requirements as they arise and at a reasonable cost.</p>
D.6	Key information on the key risks that are specific to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it	<p>The Certificates may provide for an automatic early redemption linked to a specific event. Therefore, this may prevent the Certificateholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.</p> <p>The terms and conditions of the Certificates may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Certificates may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Certificates allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the maturity date of the Certificates, postpone the maturity date of the Certificates, early redeem the Certificates on the basis of the market value of these Certificates, or deduct from any due amount the increase cost of hedging, and in each case without the consent of the Certificateholders.</p> <p>Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Certificates are calculated by reference to certain underlying(s), the return of the Certificates is based on changes in the value of the underlying(s), which may fluctuate. Potential investors should be aware that these Certificates may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.</p> <p>The Guarantee constitutes a general and unsecured contractual obligation of the Guarantor and no other person, any payments on the Certificates are also dependent on the creditworthiness of the Guarantor.</p> <p>Prospective investors in Certificates benefiting from the Guarantee should note that in case of payment default of an Issuer the entitlement of the Certificateholder will be limited to the sums obtained by making a claim under the Guarantee, and the relevant provisions of the Guarantee and they shall have no right to institute any proceeding, judicial or otherwise, or otherwise assert a claim against the Issuer and, in relation to Secured Certificates only, from the sums obtained following enforcement of the relevant Pledge Agreement.</p> <p>The Guarantee is a payment guarantee only and not a guarantee of the performance by the relevant Issuer or any of its other obligations under the Certificates benefiting from the Guarantee.</p> <p>The Guarantee may cover only part of the relevant Issuer's payment obligations under the relevant Series of Certificates. In such a case, Certificateholders may retain the risk that payments under the Guarantee are less than the amounts due by the Issuer under the Certificates.</p> <p>Société Générale will act as issuer under the Programme, as the Guarantor of the Certificates issued by the Issuer and also as provider of hedging</p>

		<p>instruments to the Issuer. As a result, investors will be exposed not only to the credit risk of the Guarantor but also operational risks arising from the lack of independence of the Guarantor, in assuming its duties and obligations as the Guarantor and provider of the hedging instruments.</p> <p>The potential conflicts of interests and operational risks arising from such lack of independence are in part intended to be mitigated by the fact that different divisions within the Guarantor will be responsible for implementing the Guarantee and providing the hedging instruments and that each division is run as a separate operational unit, segregated by Chinese walls (information barriers) and run by different management teams.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates, in connection with their other business activities, may possess or acquire material information about the underlying assets. Such activities and information may cause consequences adverse to Certificateholders.</p> <p>The Issuer and the Guarantor and any of their subsidiaries and/or their affiliates may act in other capacities with regard to the Certificates, such as market maker, calculation agent or agent. Therefore, a potential conflict of interests may arise. In connection with the offering of the Certificates, the Issuer and the Guarantor and/or their affiliates may enter into one or more hedging transaction(s) with respect to a reference asset(s) or related derivatives, which may affect the market price, liquidity or value of the Certificates.</p> <p>During the lifetime of the Certificates, the market value of these Certificates may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.</p> <p>The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.</p>

Forma giuridica: Società per azioni a responsabilità limitata (<i>société anonyme</i>). Legislazione di riferimento dell'Emittente: diritto francese. Paese di costituzione: Francia. B.19/ B.4b: Il 2014 è stato un altro anno difficile per l'economia, con le attività a livello globale che

hanno fatto registrare solo una crescita moderata, diversa da regione a regione. Tale tendenza continuerà probabilmente anche nel 2015, anno che si sta preparando a offrire una ripresa a livello globale inferiore alle attese, tra mille incertezze sia di natura geopolitica che in termini di mercati delle materie prime e dei cambi.

La zona Euro sta faticando a ritornare a una crescita più dinamica, rallentando così la riduzione del disavanzo pubblico. I tassi di interesse dovrebbero rimanere ai livelli minimi, ma il rischio di deflazione dovrebbe essere tenuto sotto controllo grazie all'intervento della BCE che ha annunciato l'adozione di una politica monetaria più accomodante e l'utilizzo del proprio bilancio per sostenere la crescita. Il deprezzamento dell'Euro e il calo dei prezzi del petrolio dovrebbero contribuire a migliorare le esportazioni e a stimolare la domanda interna. L'economia USA dovrebbe continuare a rimanere positiva e si prevede che la Fed avvierà le proprie attività di stretta monetaria verso metà anno. I paesi emergenti stanno vivendo una fase di crescita più moderata, specialmente per quanto riguarda la Cina. L'economia russa si trova ad affrontare le conseguenze della crisi in Ucraina e del crollo dei prezzi delle materie prime.

Dal punto di vista normativo, il 2014 ha visto l'implementazione della Unione Bancaria. La Banca Centrale Europea ha assunto la guida del Sistema Unico di Vigilanza, controllando circa 130 banche della zona Euro, allo scopo di rafforzare il sistema bancario, ripristinare la fiducia degli operatori economici, armonizzare le norme di vigilanza bancaria e ridurre il collegamento tra banche e rispettive autorità nazionali.

In termini di coefficienti normativi, il Gruppo è già in grado di soddisfare i nuovi requisiti.
